

ECO BUILDING GROUP

We make your world GREEN again

Dream it , Build it, Live it!

It has never been faster and easier to realise your dream

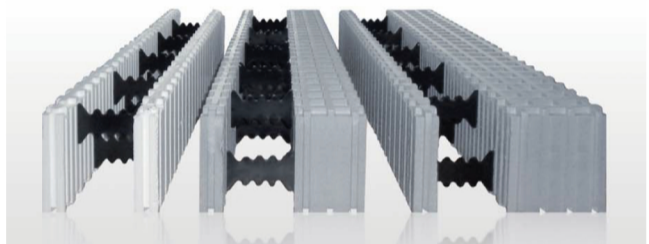

“When we were searching for our new dream house it had to be...”

★ **ENERGY EFFICIENT**

★ **COST EFFECTIVE**

★ **SEISMIC STABLE**

★ **LUXURY FEELING**

We found ECO BUILDING which ticked all the boxes and were immediately convinced!”

“The idea to build a low energy or passive house which saves money at the construction and needs very low heating/cooling has always been our choice. And it is good for the environment too!”

From family homes, town houses, social housing, elderly homes, city hall buildings, hotels, student accommodations, office projects to industrial constructions, any shape or size is possible with ECO BUILDING.

If you calculate the building costs and add an estimated 10 years heating/cooling cost, compared with a traditional construction, you will immediately understand that nothing can beat the ECO BUILDING technology.

The ECO BUILDING products offer specialized solutions to construct well-insulated underground parts of the building, outside walls, floor slabs and roofs.
